This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. NOTICE.

In a catalogue of the alumni, with the meagre information at hand, many errors must necessarily occur. While the utmost efforts have been made to secure accuracy, the Secretary is assured that he has, owing to the impossibility of communicating with many of the Alumni, fallen far short of attaining his end. A copy of this catalogue will be sent to all whose addresses are known, and they and their friends are most earnestly requested to furnish information about any Alumnus which may be suitable for publication.

Corrections of any errors, by any person whomsoever, are respectfully invited.

Communications may be addressed to

A. L. HULL,

ALUMNI,

WITH THE DEGREE OF BACHELOR OF ARTS.

Under the rule of the Trustees the degree of A. M. was conferred upon all graduates of the University of three years standing. This rule continued in force until 1871. All Alumni prior to 1868 excepting such as died within three years after graduation, were MASTERS OF ARTS.

The record of students who matriculated but who did not graduate prior to 1814 has been lost. So from 1851 to 1861. The list has been supplied from other sources as far as possible, but doubtless there are many omissions.

The addresses given are those last known.
